

## U-Pointer – interactive virtual board

In conjunction with a projector and notebook or PC with U-pointer any wall or table can be converted into an electronic and interactive virtual white board. U-pointer can be taken anywhere and easily deployed and is fixed mounted compared to interactive panels is is also much cheaper.

- Easy installation: Insert the U-pointer on the top of the beamer and connect it via a USB cable to the PC;
- set up the U-pointer on the table and set it on rotary switch;
- weight and easy installation of U-pointer makes it your favorite presentation partner;
- Interaction: Single & double-click, and a conventional drag and drop mouse are all fully supported by the Pointer Pen;
- maximum mobility through wireless presentation on a projection up to 150 cm diagonal;
- Interactive control of the PC;
- Accurate works: The high resolution of the U-pointer allows you smaller letters than on a Tablet PC to write;
- a fast response time of more than 60 frames per second sampling rate gives you the feeling as if you were working on a traditional white board;
- Benefits of i-Pro: Draw on the whiteboard instead of rigid frames to show only increases the effectiveness of your presentation dramatically;
- will be no need for listeners to take notes, and the eyes of the public always be directed to either the screen or the moderator. Subscribed or written notes can after the presentation in the computer file to be printed format.
